
Thank you for buying Art Gallery Vol.13!

Art Gallery Vol.13 – Modular Museum Environment
Art Gallery Vol.13 is a modular environment asset designed to create modern museum and art gallery interiors in Unity. This package includes a collection of high-quality 3D models, textures, and prefabs that allow developers to quickly build realistic exhibition spaces for games, architectural visualization, virtual museums, and VR experiences.

The modular design makes it easy to assemble exhibition halls, corridors, and gallery rooms, providing flexibility to create unique layouts and exhibition environments.
The environment is optimized for performance while maintaining high visual quality, making it suitable for both desktop and VR projects. A demo scene with baked lighting and a configured post-processing setup is included to help you quickly integrate the assets into your project.

This package is ideal for developers creating:
• museum environments
• art exhibitions
• architectural visualizations
• exploration games
• virtual galleries
• VR experiences

The modular system allows easy customization and expansion, giving you the flexibility to design unique gallery layouts and immersive exhibition spaces.

Built-in render pipeline:
To begin, we need to install the post-processing package. Let's click on Window > Package Manager. The Package Manager window will pop up.
